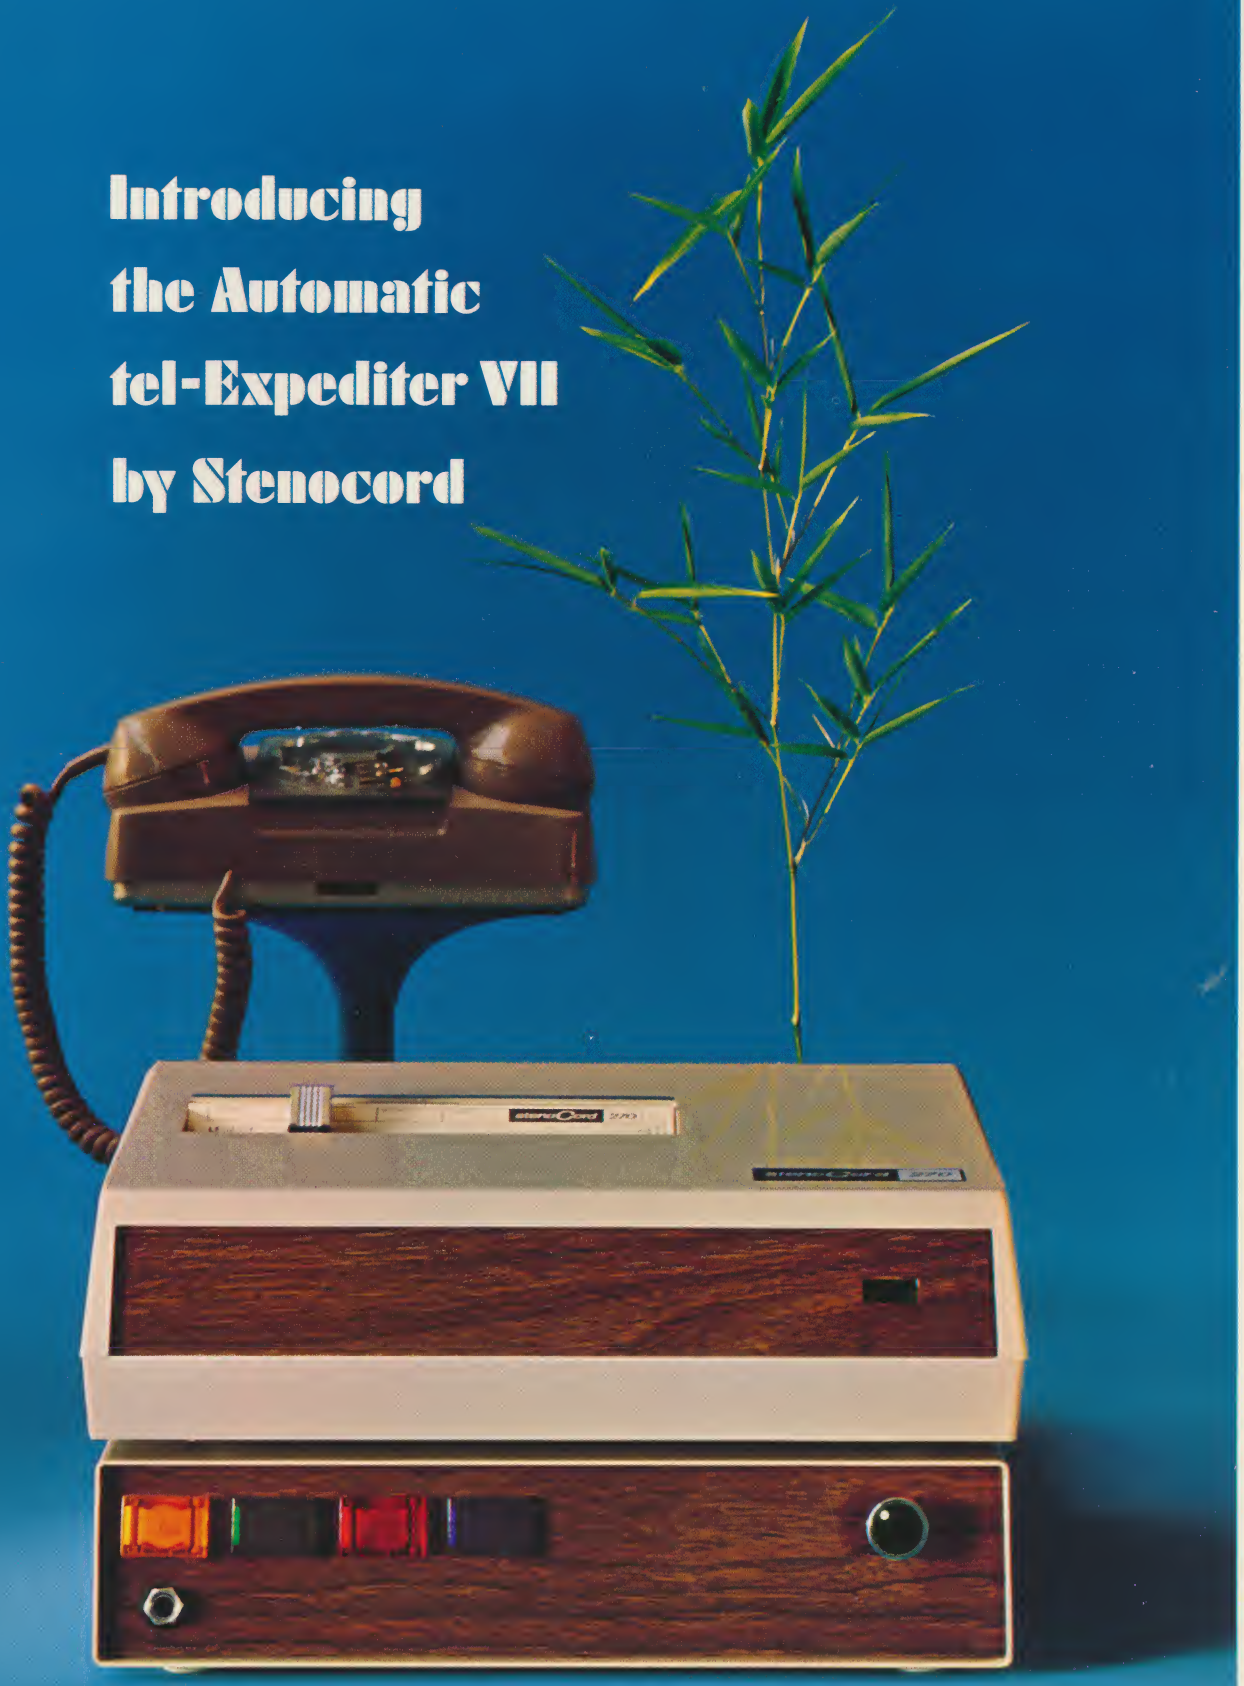
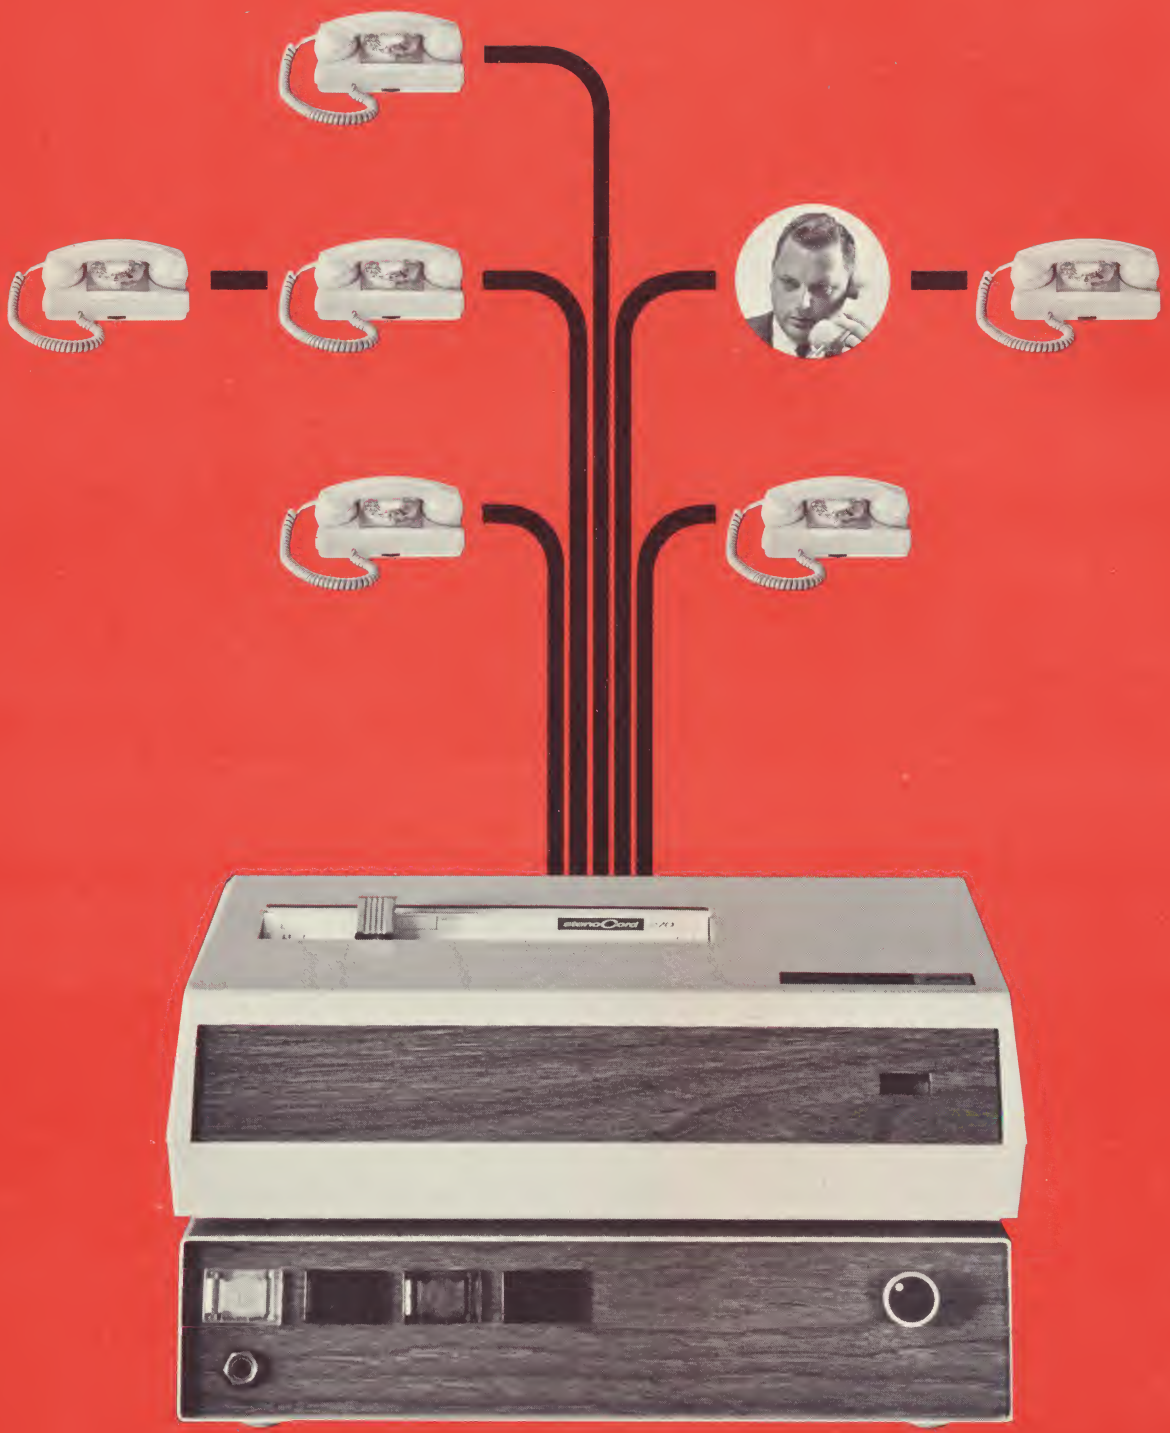
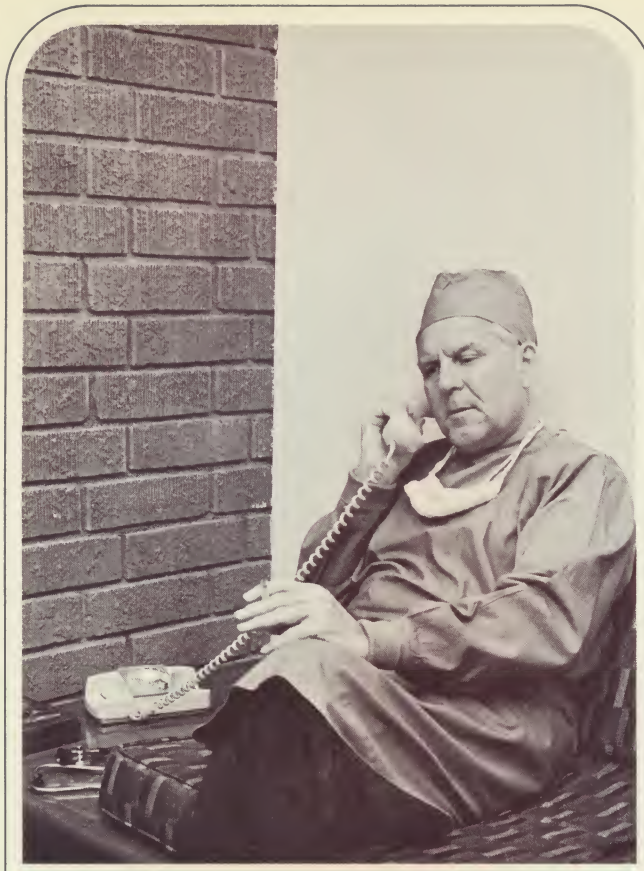
Introducing the Automatic tel-Expediter VII by Stenocord





Foolproof performance from a sensibly-priced central dictation system.

Stenocord's precision engineered central system answers the needs of every dictator. Doesn't confuse. Requires little attention. ▪ Why? It's a fresh approach. Everything is automatic. Dictators just pickup, talkup, hangup. ▪ The tel-Expediter VII even selects an available recorder like a computer. ▪ A new electronic memory system assures privacy. ▪ The heart of the system is the magnetic Stenobelt. That means error-free dictation, wide track recording and true-fidelity sound. ▪ Safety features are built-in. Dictation cannot be lost. ▪ Test the tel-Expediter VII now. Start with someone in kindergarten. We said it was foolproof.



Post operative report secured at 2 a.m.

Executive dictation – quick and accurate.

Record additional data from offices.

Dictation privacy in open offices.

Stenocord 260 Transcriber

Everything needed for fast, accurate transcription. Speed, volume and tone controls match dictation to typing performance. Changes made during dictation eliminate unwanted words. Confusing explanations of corrections are unnecessary. Live audible scanner permits quick review of any idea, word or phrase. Balanced sensitivity foot control offers measured backspacing. Index system indicates number of typewritten lines—shows special instruction areas. The 260 is easy on typists—makes them smile again.

ITEM 131 PRINTED IN U.S.A.

tel-Expediter VII

Simple

Easy as using a telephone. Dial pulses control all functions. Offers unlimited review within the privacy of a single recording period. Invites maximum utilization by busy personnel.

Foolproof

Completely electronic. No mechanical gadgets to require constant adjustment and repair. Eliminates all possibility of lost dictation. What's been said is as good as typed.

Magnetic

It's easy to change dictation on a Stenobelt. Just back up and talk. Incorrect version is replaced by new wording. This means greater speed and accuracy in transcription. Stenobelts can be filed or mailed—always sound clear.

Safe

Audible and visible signals indicate recorder availability. Complete lockout assures transcription of all material. A tel-Expediter VII recorder will not accept improperly erased Stenobelts. No one can interfere with the dictator's privacy.

Convenient

The tel-Expediter VII is always ready—activates instantly when selected. No warmup time with solid state electronics. Handsets are available at all logical thought dispatch locations. Intercom line lets dictator call attendant for extraordinary instructions.

Versatile

The tel-Expediter VII can be engineered to specifications. It's compatible with Stenocord's entire line of dictation instruments. Additional recorders can be added easily to handle increased workload.

Economical

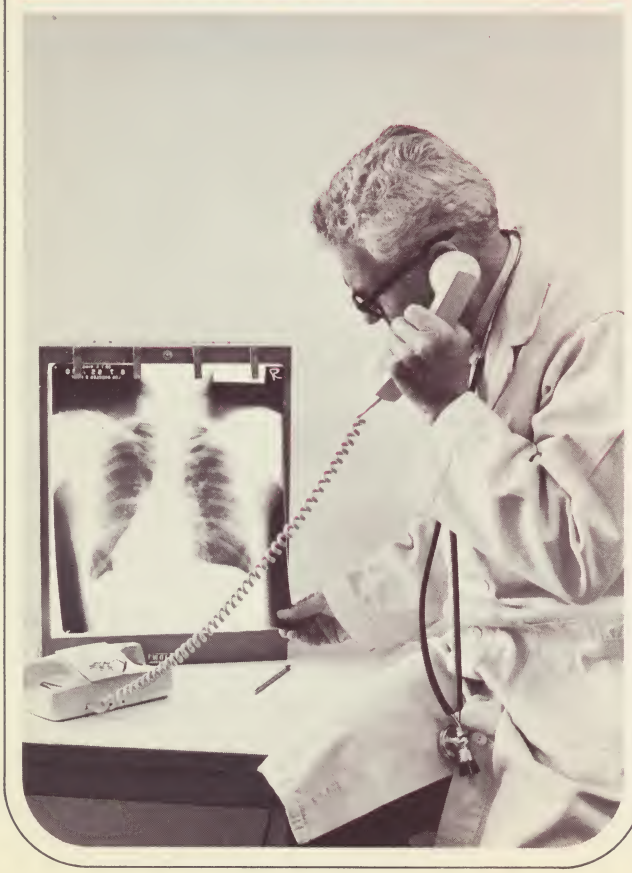
Simple two-line wiring system means reduced installation cost. Fewer moving parts and rugged construction means dependable operation—eliminate costly down time. Stenobelts are reusable. Forget costly "throw away" media.

Extras

All equipment is guaranteed. Workload studies and surveys assure the most efficient system. Qualified engineers provide expert installation. On-the-job instruction helps dictators and and transcribers gain maximum efficiency. The tel-Expediter VII is sensibly designed to match any decor.

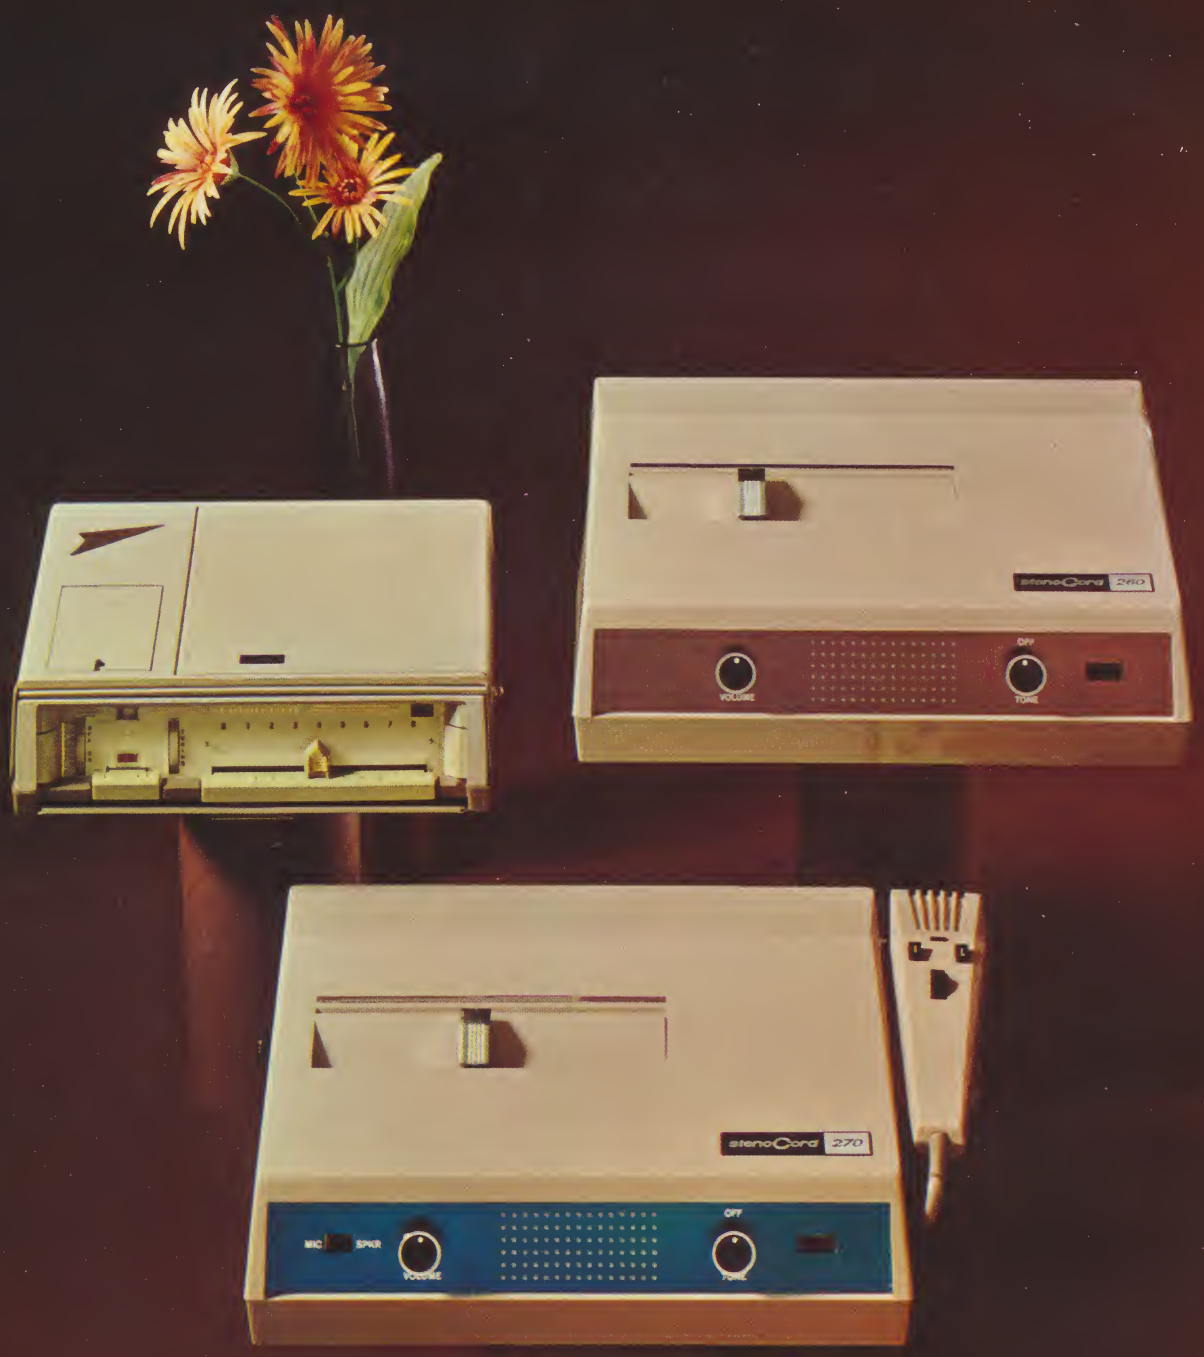
Dictator instructs over intercom line.

Dictate from any thought-dispatch point.



Stenocord Dictation Systems

leader in true-fidelity, magnetic belt dictation



STENOCORD

270

DICTATOR/TRANSCRIBER

Quality and dependability at substantial savings. The reason: Stenocord's revolutionary electro-mechanical design. It's rugged — simplified with fewer moving assemblies.

Remarkable tone quality. You sound like yourself and secretaries understand every word.

Puts complete control under your thumb. You start, dictate, review, correct, stop — all with one simple control on the microphone. You "compose" your best dictation easily.

To indicate the end of a letter or mark special instructions, you just touch a button. It happens instantly—electronically.

A simple switch on the back of the microphone lets you set the Stenocord for flawless recording.

Choose from five color panels.

STENOCORD

260

TRANSCRIBER

A perfect companion to Stenocord's entire line of compatible dictating machines. Secretaries hear correct version the first time. Changes during dictation eliminate unwanted words for faster transcription.

Reproduces every syllable with true fidelity for accuracy.

Secretaries can pinpoint any word or phase with "live" audible scanning. Adjust dictation playback to match typing speed.

Feather-light listening device and balanced sensitivity foot control are part of the 260—designed for maximum comfort and efficiency after extensive office research.

Versatility is the Stenocord 260 concept. Controls can be adjusted so they work as a team with the individual secretary. Makes transcribing a breeze!

STENOCORD

500

"EXPLORER" PORTABLE

Everything you need for efficient away-from-the-office dictation in one handsome, lightweight package. This self contained dictating/transcribing machine is transistorized . . . has a permanent battery and built-in recharger.

Forget your pencils, paper, batteries and recharger next time "in the field." Dictate letters, reports, ideas and instructions on a magnetic belt. Slip it into an ordinary business envelope and mail it to the office for transcription.

The built-in recharger takes power from any standard outlet —even your automobile cigarette lighter.

Office quality dictation in one 6 lb. 6 oz. unit. So compact even the microphone tucks away into its own compartment.

stenobelt

Stenobelt can be filed, mailed and re-used thousands of times. One customer has dictated over 12,000 letters on the same Stenobelt. It still records faithfully.

Stenobelt is flexible because it's magnetic. Lets you change dictation instantly. No need to explain mistakes. Just back up and redictate. The unwanted version is erased and new material is recorded automatically. Your secretary hears correct dictation the first time. This means better letters, accurate speedy transcription and more secretarial time for other office projects.

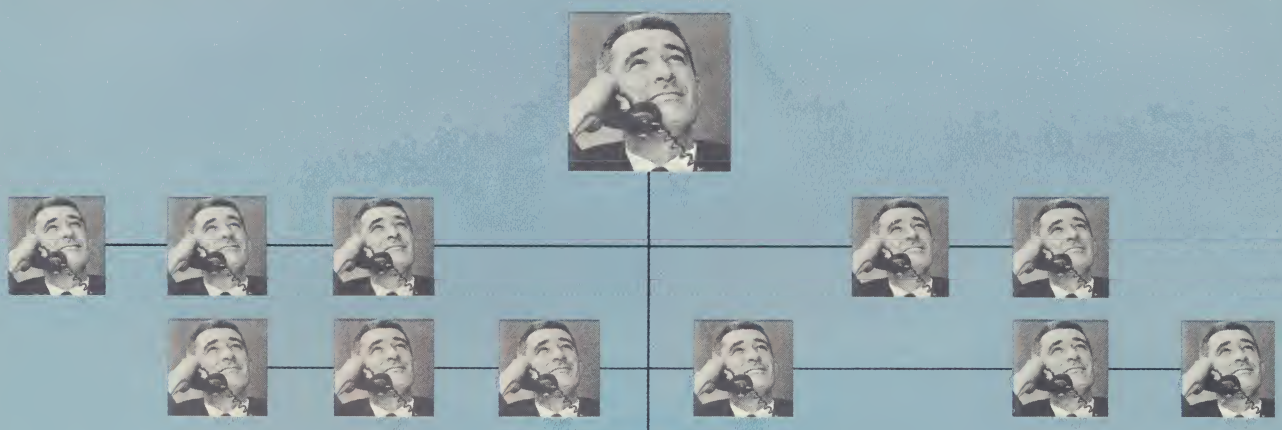
True-fidelity is the result of Stenobelt's "wide track" recording and greater speed.

"Wide track" recording means that sound tracks are further apart so the pickup can lock on and hold perfect playback. Recordings don't overlap to produce double talk and echoes. Stenobelt's have greater speed. Sound quality is always better when magnetic media travels faster. You must hear it to believe it.

systems

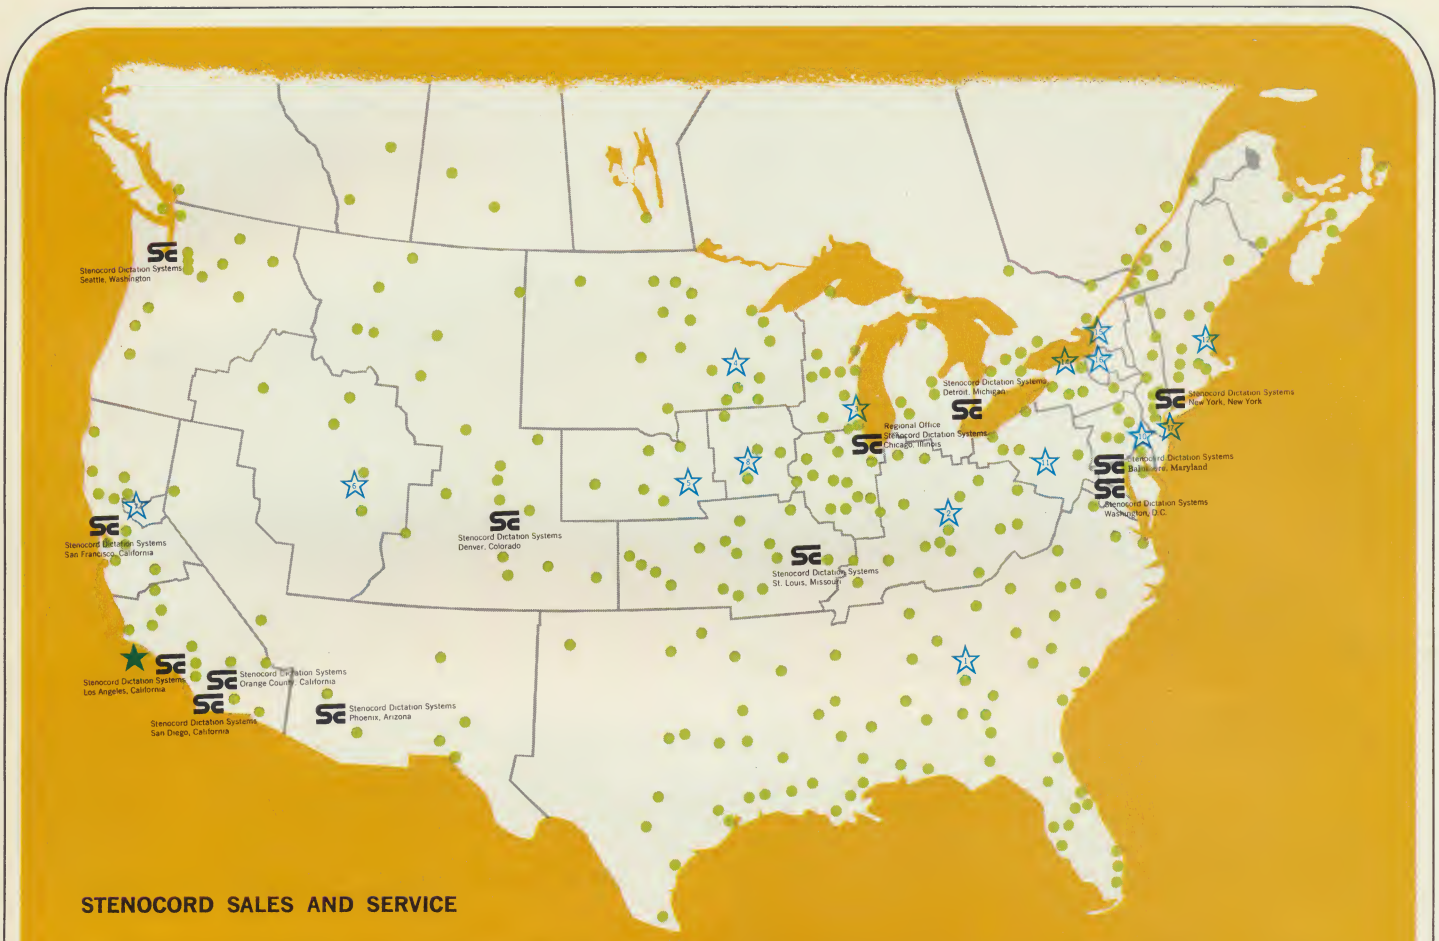
A complete line of dictation systems is also available from Stenocord. Each is tailored by expert engineers to fit any organization — any situation. Each uses the Stenobelt.

New tel-Expediter Central Dictation Systems



One or more recorders in transcribing pool or at secretary's desk

One of the most versatile yet reasonably priced compatible magnetic belt central systems available. Can be adapted as a separately wired system to provide the convenience of phone dictation without tying up regular telephone communications. Or, connected to linkage provided by your telephone company to operate through standard PABX switchboards. The separately wired version employs a separate phone on the executive's desk wired directly to a recorder at the secretary's desk—or between several dictators (each with his own phone) and a stenographic pool. The telephone line system permits every phone to serve as a dictating instrument to provide the economic benefits of modern machine dictation even to low volume dictators. Either system can be expanded by simply adding more central recorders. Your Stenocord representative will be happy to consult with you on equipment needs and supply prices on request.



STENOCORD SALES AND SERVICE

Stenocord has over 340 sales and service facilities in the U.S. and Canada. Factory trained technicians provide expert service and maintenance on all Stenocord equipment.

World-wide sales and service facilities are also available to Stenocord customers. Our international network of service centers covers 39 countries of the free world.

Something extra from Stenocord

With every piece of dictation equipment, Stenocord customers receive a significant bonus — a promise of service and dependability. The Stenocord Corporation, through its individual representatives, pledges to each customer: the greatest available savings in letter-writing costs; a precision engineered product offering the highest quality in the dictation machine field at a sensible price; unequaled professional counseling by a nation-wide staff of communications specialists; sincere and patient instructions in every phase of equipment operation and technique for customer employees; prompt, efficient and courteous service on all equipment by well trained technicians; a complete dedication to the customer's interest. This is a way of expressing our gratitude to customers who are leaders in government, education, commerce, industry and other professions. It is also our hope that tomorrow's customer realizes he is making a new acquaintance — Stenocord service and dependability.

Hear Stenocord true-fidelity in your office.

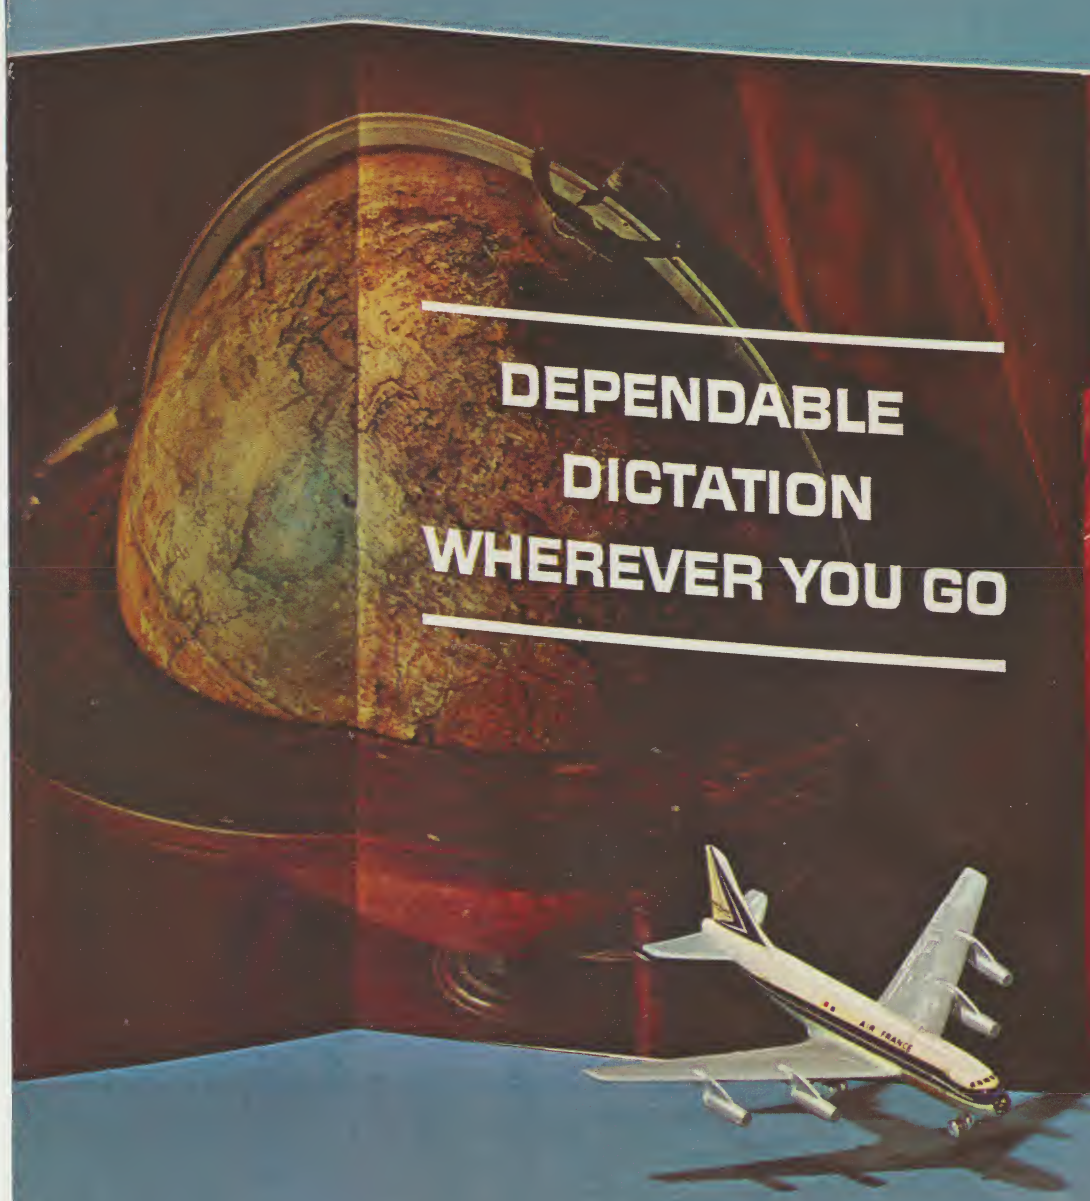
the stenoCord Explorer
...first completely self-contained portable dictating machine

stenoCord Explorer ... fully transistorized, permanent battery, built-



At home the Explorer cuts the time you have to spend away from family activities. You dictate letters, or special reports in a fraction of the time it would take you to write them longhand . . . you capture random thoughts and ideas the moment they pop into your mind.

Your Explorer, waitin
make a business cal
while they're fresh i
the followup letter t
thoughts or ideas as

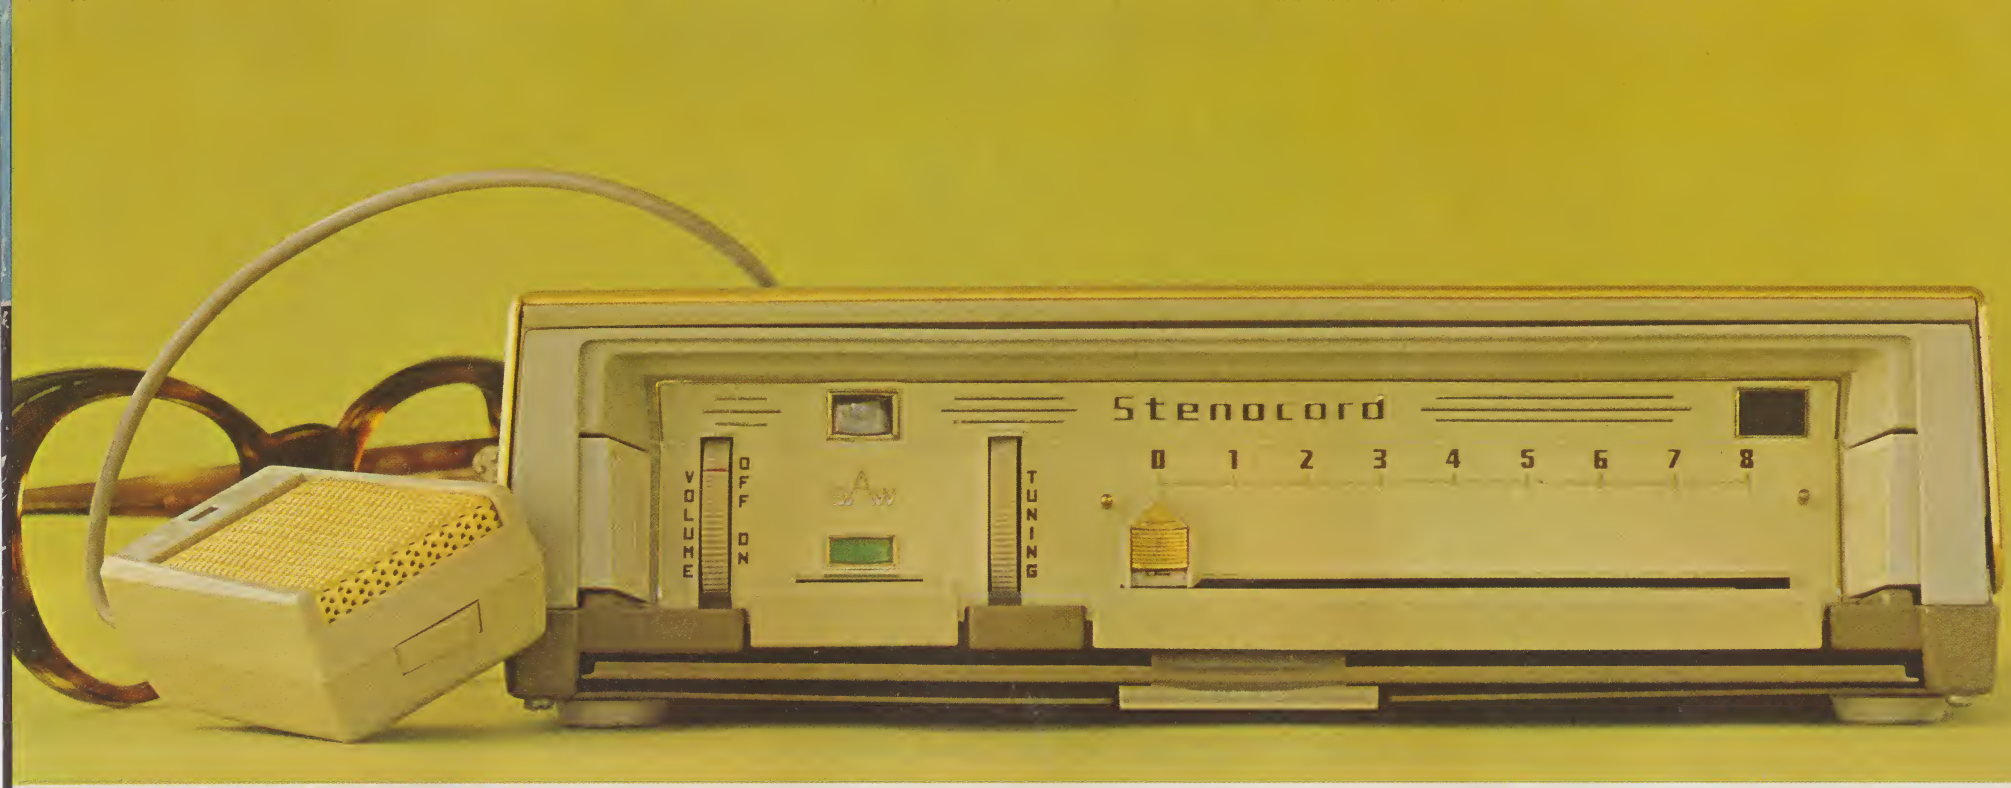
...in recharger, magnetic belt

Everything you need for efficient away-from-the-office dictation in one handsome, lightweight package. Offers more features than any true portable dictating machine available, yet you save as much as one-third. If you've never enjoyed the benefits and advantages of a portable dictation unit, then let the magnetic belt Stenocord Explorer give them to you. It's the next best thing to a secretary for note-taking after a sales call on the other side of town, or on a business trip to the other side of the world.

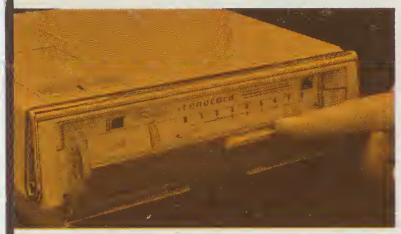
...patiently in your car while you ...lets you dictate the details ...your mind. You can even dictate ...en and there, or record special ...they occur to you.

The Explorer works well for you whether you're in Kankakee or Karachi. Operates on its own power, or from the nearest wall plug. Simply dictate your letters and reports, slip the magnetic belt into an ordinary business envelope, then mail it back home to be transcribed.

The Explorer makes it easy to record on-site reports, comments, instructions. And when you need a recharge, you're not tied to a wall plug (or have to have remembered a pocketful of batteries)—the nearest auto cigaret lighter serves as a power source!

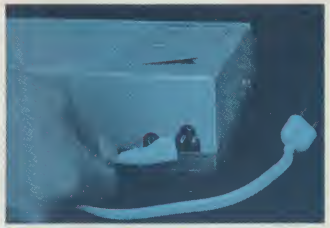


THE MAGNETIC BELT EXPLORER . . . designed and engineered so that everything necessary for office-quality dictation is built right into the Explorer's sleek aircraft magnesium case. Permanently reusable magnetic belt (compatible with Stenocord's office units) lets you enjoy error-free dictation. Operates with Stenocord's famous simplicity to control every dictating function. Slim enough (2½" x 9" x 8⅝") to slip into a business case, and light enough (only 6 lbs., 6 oz. with everything) to carry easily and conveniently. Don't let another day go by without seeing how much the Explorer can help you.



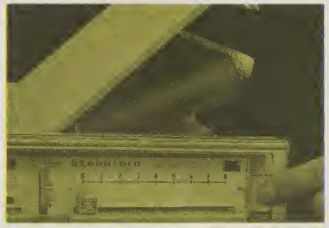
Disappearing Front Panel covers face of machine for extra protection while traveling—slides out of the way when you're ready to dictate. The slim, handsome case is made of strong magnesium aircraft alloy for rugged use, and is finished in a handsome brown and beige color combination.

Pushbutton opens sealed compartment, instantly releases microphone and its 30" self-winding cord. All-purpose microphone records dictation or conferences, provides playback, has stop-start lock-on switch and dictate signal light. Volume and tuning controls conveniently located in front.

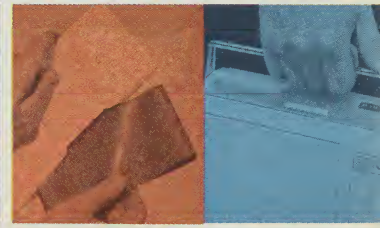


Battery Charger and up-front power supply indicator are built in. Permanent nickel-cadmium battery can be recharged from 110/130 V, 200/240 V, 50/70 cycle power sources anywhere. Eliminates frequent, costly and inconvenient battery replacement. Optional cord for charging from 6/12 V auto.

Live Scanning with handy fingertip control permits instant, audible review of any part of your dictation. Lets you change your mind and revise in a split second—lets you write your best letter the first time! Pushbutton marks end of letters on index strip.



Belt Compartment pushbutton opens unit for instant change of dictating medium. Signal bell sounds 30 seconds before end of belt. Magnetic belt permits error-free dictation, and is fully compatible with all Stenocord units. Belt is permanently reusable. Can be mailed in ordinary envelope.



Self-Contained Handle permits easy carrying—folds back when not in use. Optional shoulder strap is available for those whose job requires they dictate while walking about.

Other optional accessories include telephone recording attachment and secretarial listening device.

Today . . . phone or write for a no-obligation demonstration of this phenomenal new portable dictating instrument!

stenoCord DICTATION SYSTEMS

ITEM 113

PRINTED IN U.S.A.

2 telephones ?

No! The one on the left is the new Stenocord tel-Expediter IV dictating machine

Stenocord's tel-Expediter IV gives you executive dictation as it should be... simple, fast, efficient, error-free, superb in quality

The tel-Expediter IV is a separately wired system which provides the cost-savings, and extraordinary convenience of "phone" dictation, without need to tie up regular telephone communications. It's the first such system featuring the magnetic Stenobelt.

The tel-Expediter IV is based on the use of a separate phone on the executive's desk, wired directly to a recorder located at his secretary's desk; or between several dictators—each with his own phone—and a stenographic pool.

Either way simplicity is the key to the whole system. As far as the individual is concerned, the beautifully designed tel-Expediter IV phone is actually the dictation machine. Dictating is as easy as 1-2-3. He just picks up the phone. Talks. Hangs up. That's all.

Benefits

1. Dictator is relieved of the need to service a dictating machine, i.e., changing media, marking index strips, etc.

2. Machine is always loaded, always ready, because it is tended by a secretary—at her desk—not by dictator at his.

3. Because the dictation is being recorded right at secretary's desk it is returned for signature that much faster—helps get "today's letters out today." She can always check work volume too, and integrate transcription with other responsibilities. Makes for greater efficiency and time-savings for everyone.

Special advantages

1. The tel-Expediter IV is the most economical of any remote phone dictation system;

2. Can be used between an executive and his secretary; or between two or more dictators, tied into multiple recording units in a stenographic pool;

3. Easily installed—all phones are connected to recorders by simple 4-conductor cables; *if you are replacing an old phone dictation system, you can tie the tel-Expediter into existing wiring, and save even more.*

Unique features

1. Dictator simply pushes the button on the hand-set and talks—dictation is that easy;

2. Audible signals give adequate indication to dictator of recording time left on belt;

3. Optional hand-set on secretary's desk gives dictator the added convenience of a private inter-com;

4. A "ready" light on the phone indicates to dictator that the system is available to him;

5. Dictator has complete "privacy" while he's dictating. tel-Expediter IV is *not* a party-line system;

6. Each phone gives the dictator the facility to mark the end of letters, render special instructions, review dictation on an unlimited basis, as well as contacting his secretary on the inter-com.

A point-by-point comparison between the tel-Expediter IV and any similar system—at anywhere near the cost—will prove that your best buy is Stenocord . . . pioneer in the field of magnetic belt dictation.

About Stenobelt

tel-Expediter IV is the first remote phone system to use this most modern of all dictating media. It delivers a magnificent tone quality unique to magnetic recording—and it's a quality that can't be scratched off. It permits error-free dictation because changes and corrections can be "talked" right over the error. And the magnetic belt is permanently reusable—can be used thousands of times. Offers important savings over one-use media. Can be filed, folded, mailed in an ordinary envelope. Fully compatible with other Stenocord dictating instruments.

Stenocord tel-Expediter IV

Remote recorder complete with all dictation features for installations of one or more recorders. This unit enables the dictator to control start and stop of the belt, to listen back to 5 seconds of recording with each touch of the Listen button, to erase or correct by remote index and to have intercom with operator. Complete with machine (less intercom and dictation phones).

tel-Expediter IV Dictator Phone—for One Recorder

This unit is for remote dictation to Recorder. Complete with record button, ready light, listen back button, end and contact button for remote indexing, and operator call button. Lockout provides complete privacy.
tel-Expediter IV Dictator Phone
